CAREER OBJECTIVE

Computer Science undergraduate with hands-on experience in Java and front-end development (HTML, CSS, JavaScript), building responsive, production-ready web applications. Strong foundation in Data Structures, Algorithms, and OOP, with a track record of writing efficient, scalable code. Aspiring Software Engineer focused on building high-performance software systems.

EDUCATION

B. Tech (CSE) JECRC University CGPA: 7.29	(2023 - 2027)
Higher Secondary (12th) Swami Vivekanand Government School 64.05 %	2023
Secondary (10th) U.R.M. Public School 69.50 %	2021

SKILLS

Technical skills

- **Programming Languages:** Java, C, C++, Kotlin, JavaScript (ES6+).
- **Frontend:** HTML5, CSS3, JavaScript, Responsive Web Design, DOM Manipulation.
- **Course Work:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Design Principles.
- **Tools & Platforms:** Git, GitHub, VS Code, Netlify, AutoCAD.
- **Others:** Other: REST APIs, Serverless Architecture, PDF/Document Processing.

Soft Skills: Effective time management, Team work, Communication, Attentive listening

PROJECTS

CashFlow (Expense & Income Tracker) | cashflow-eit.netlify.app (Mar 2026 – May 2026)
(HTML, CSS, and JavaScript)

- Engineered a 5-page personal finance web app (Dashboard, Transactions, Add-Transaction, Reports, Settings) using HTML, CSS, and JavaScript, supporting secure user login.
- Implemented transaction categorization and search across multiple budget categories, enabling users to set and track monthly and category-wise spending limits.
- Built dynamic chart-based reporting to visualize spending trends, replacing manual spreadsheet tracking with real-time financial insights.

ResoBuild (Resume builder & ATS score checker) | resobuild.netlify.app (Jun 2026 – Present)
(HTML, CSS, and JavaScript)

- Architected a full-stack resume builder with live editing, drag-and-drop section reordering, and one-click export to PDF and Word formats.
- Integrated AI-powered resume rewriting via a secure serverless API, supporting PDF, DOCX, and image uploads.
- Developed an ATS compatibility scorer that generates match scores and keyword gap analysis against job descriptions, helping users close resume-to-JD gaps.
- Designed a privacy-first, serverless architecture with local data persistence for fast, secure performance — deployed on Netlify.
